

Jam-bo! Coding Collective - Empowered to build your new software, websites and mobile solutions. We are a team of 20 passionate, skilled African refugee developers - who love to code!

Our Collective was founded in 2017 by our teacher and mentor Alain Ngombwa. Tap into the innovative potential of African youth and help us in our mission to give back to the community.

Mobile Apps

Mobile app development
Android / iOS / Mobile Web

Web Development

Programming (C++, Javascript, Python)
Web design (HTML, CSS)

Networking

Our Team

We are proud of our global team that brings together local talent from Africa, senior developers and international advisors.

At the moment, our core team are 20 certificate students that are the first to graduate from an innovative learning program that started in 2017. We are poised to work on your project, and we are looking forward to supporting more and more refugees to undergo training and join our ranks. We strive to reinvent our lives, earn a stable livelihood, become valuable community members and stay safe.

Teamwork

We work well with each other. We have a long history of working together as a coordinated team. You will profit from our great team spirit when you work with us.

Communication

We communicate fluently in English. If hired to create a mobile app, we are able to ask the right question to gain an understanding of what you need, and to keep you updated on the progress.

Problem Solving

As a mobile developer, a big part of our job will be to troubleshoot issues with applications on Android or iOS platforms. We are able to recognize various technical problems and understand how to resolve them.

Time Management

We work well with each other. We have a long history of working together as a coordinated team. You will profit from our great team spirit when you work with us.

Work Ethic

We communicate fluently in English. If hired to create a mobile app, we are able to ask the right question to gain an understanding of what you need, and to keep you updated on the progress.

Conflict Resolution

As a mobile developer, a big part of our job will be to troubleshoot issues with applications on Android or iOS platforms. We are able to recognize various technical problems and understand how to resolve them.

Our Skills

Emmanuel

Front-end Developer

Skill Level:

Sr. / Lead

20% Community

20% Education

60% Jam-bo Team

Our Model

Our pricing model emphasizes fairness and giving back to our refugee community:

- Our clients pay fair, transparent market rates to JCC.
- JCC pays 60% of that money directly to the developers
- 20% goes back to the refugee community we live in.
- 20% finance the education program for further IT students.

Our Mission

Jambo Coding Collective is a team of enthusiastic IT professionals in Kampala, Uganda. Led by Alain Ngombwa, this collective has individuals who are refugees in Uganda and are working hard to learn tech skills that make them earn a livelihood with respect and pride. The collective is aligned with the UN sustainable developments goals to achieve a better and more sustainable future for all.

Advisory Board

Jambo Coding Collective is supported by Jesuit Refugee Service. JRS seeks to accompany, serve, and advocate the cause of refugees and other forcibly displaced people, that they may heal, learn and determine their own future.

Partner Organizations

Jambo CODING Collective also works with partner organisations like ADEPT and FRIDIE to mentor, upskill and deliver projects with latest technology.

Let's Work Together!
